

NAA Framing Requirements

How Should the Art be Presented?

NAA framing requirements and standards insure that the artwork is properly protected and the customer is satisfied with the quality of his/her purchase. All 2D work must be framed and wired. Wire should be secured 1/4 to 1/3 down from the top of the piece. Matted work must be framed with glass or plexi-glass. Mats should be clean. Acceptable hardware for wood frames are screw eyes or D-rings. Acceptable metal frames should have hardware that screws securely in the track. No saw tooth hangers, spring clips, tension mounts, standing photo frames, sliding hardware or pop-in frames. The backing of the piece should be neat and clean. Gallery wrapped canvas (without a frame) is acceptable with deep profile stretcher, stapled on the back with clean or painted sides.
