

Ron Emmerling

Ron, a successful industrial designer and founder of Emmerling Designs in Nyack, NJ, retired in 2003. An artist all of his adult life, he was then able to devote himself wholeheartedly to his photography, sculpture and drawing. In 2010, Mr. Emmerling experienced a stroke, which paralyzed his right side. With much dedication and encouragement, Ron began to explore creative expression with paint, with his left hand, in acrylic. The continued, astounding confidence he expresses as a painter, is incredibly inspiring. His work, so bold in color and form, has been excitedly received, much exhibited, and is happily, competitively collected.
