

Susan Kneeland's artwork is as much an enigma as the artist herself. It is immediately recognizable for its vibrant, heightened, colors, and yet, her monochromatic artwork is equally notable.

Proficient in all media and subject matter, her most desired and collected pieces come from her extensive, ongoing "road series" as well as her impressionistic "beach series".

Susan educates young and old in private studio classes, as well as en plein air, year round. In addition, she instituted an art therapy program, over twenty years ago, for the elderly whom reside in nursing homes.
